

The background features a stylized, light blue illustration of two people sitting in chairs at a table, facing each other in an interview format. Above their heads are two large, light blue speech bubbles. The overall aesthetic is clean and professional.

Interview Readiness Score

Every year, millions of graduates enter the job market — but most discover their preparation gaps after a failed interview. This tool changes that. Measure your readiness objectively, identify weaknesses early, and walk into every interview with evidence-backed confidence.

The Problem We're Solving

The Hidden Gap

Students prepare in isolation and only discover weaknesses when it's too late — after rejection. There's no objective way to measure readiness before facing real recruiters.

Our Mission

*Build a tool that evaluates technical skills, resume quality, communication, and portfolio — then delivers a personalized **Interview Readiness Score** with targeted improvement plans.*

Five Pillars of Readiness

The platform evaluates every dimension of interview performance — from psychological resilience to technical precision.

Cognitive & Psychological

Stress response, emotional resilience, and confidence detection under pressure

Objective Assessment

Linguistic analysis, STAR scoring, and knowledge proficiency heatmaps

Simulation & Environment

VR boardrooms, peer battles, and real-time feedback modes

Advanced Tech Integration

Job description scraping, resume-to-voice consistency, and AI coaching

Long-Term Growth

Shareable readiness passport, mentor matching, and community insights

Know How You React Under Pressure

Biometric Stress Analysis

Wearables track heart rate variability, pinpointing which topics trigger fight-or-flight responses.

The "Curveball" Injector

AI switches personas mid-interview — from encouraging to skeptical — testing emotional resilience.

Imposter Syndrome Meter

Compares self-assessment against AI performance data, revealing perception vs. reality gaps.

Micro-Expression Feedback

Camera detects nervous "tells" — blinking, poor eye contact — signaling low confidence.

OBJECTIVE ASSESSMENT ENGINES

Data-Driven Feedback, Not Guesswork

The "Fluff" Detector

Flags filler words and buzzwords, pushing students to replace them with concrete, measurable evidence.

STAR Method Scoring

Scores answers on Situation, Task, Action, and Result — the framework recruiters actually use.

Knowledge Map Heatmaps

Visual dashboard showing proficiency across Technical, Cultural Fit, and Leadership categories.

The "Pause" Analyzer

Distinguishes a thoughtful pause from a struggle pause based on answer quality.

Chiu, Yu-Wen. (2024). The knowledge gaps in social media marketing for the agriculture industry. *International Food and Agribusiness Management Review*. 28. 1-23. 10.22434/ifamr1135.

Practice in the Real Environment

1

VR Office Simulations

High-pressure VR environments — glass boardrooms, panel interviews — desensitize students to real settings.

2

The "Shadow" Interviewer

Watch a "perfect" candidate answer the same question you just struggled with — side by side.

3

Collaborative Mock Battles

Two students interview each other while AI referees and scores both performances.

4

30-Second Pitch Gauntlet

Explain complex concepts to non-technical personas in under 30 seconds — rapid-fire mode.

Great!

Words Per Minute : 100

Minutes Per Response : 1:32

AI That Works as Hard as You Do

1 Dynamic Job Description Scraper

Scans any job posting URL and generates a bespoke interview script tailored to that company's culture and tech stack.

2 The "Reverse" Interviewer

AI asks: "What questions do you have for me?" — scoring the strategic depth of your inquiries.

3 Real-Time "Wobble" Alerts

Subtle visual cues when you talk too fast or drift off-topic, training real-time self-correction.

4 Resume-to-Voice Consistency Check

Flags contradictions between verbal stories and resume facts — the red flags recruiters spot instantly.

The Readiness Score Passport

A verified, shareable score — like a credit score for interviewing — students can show recruiters as proof of rigorous preparation.

Crowdsourced "Real-Talk" Tips

Integrates with Glassdoor to pull actual recent questions from specific firms directly into the mock engine.

AI Mentor Matching

Automatically connects students with alumni who excelled in their weak areas for a focused 15-minute polish session.
